

ENHANCE

HEALTH SERVICES

A division of Disability Services Australia

Holistic Occupational Therapy Solutions

At Enhance Health Services our Occupational Therapy (OT) team focuses on enabling people with disability to participate in daily activities to promote their health and wellbeing.

In collaboration with other allied health professionals, support staff, families/cares, support coordinators and service providers, we work towards holistic solutions in self-care, leisure & social interactions and increased independence for participants.

We identify strategies and interventions to achieve personal and NDIS goals through Activities of Daily Living (ADLs), assistive technology, modifications and sensory integration to improve their quality of life. We also provide functional interventions to assist with behaviours of concern.

Our services include:

- OT Functional assessment and therapy
- Activity of daily independent living skills assessment, intervention and report
- Seating & pressure care management (manual wheelchairs, recliner chairs, lift chairs)
- Powered mobility assessments; power wheelchairs, mobility scooters
- Manual handling education and training with carers, support staff including assessment/training, guidelines/report
- Assistive technology/equipment prescription, Level 1, 2 equipment
- Assistive technology/equipment prescription, Level 3, 4 equipment with report
- Home modification assessment (major and minor)

- Environmental assessments; community access, home/work environments, day program including report
- Housing support (SDA & SIL) assessment including detailed report for NDIS funding
- Falls prevention; pre and post fall reviews
- Sensory assessments; including ongoing interventions, recommendations and report to NDIS.

About Enhance

We are experts in positive behaviour support and offer a wide range of assessments and therapeutic services (speech, psychology and occupational therapy) for youth and adults. As a division of Disability Services Australia, we really understand people with a disability and the needs of their support networks.
