

Comprehensive Positive Behaviour Support (PBS) Package

All Enhance services are delivered by a professional team who work within the ethical guidelines of their own professional registration and within the National Quality & Safeguarding Framework. www.ndiscommission.gov.au

We use an evidence based person centred approach at all times.

Positive Behaviour Support is adapted to the individual's circumstances and therefore it is difficult to estimate a standard time, though we usually recommend a minimum of 6 months. Information is usually required from various providers and coordinating across services can be very time consuming.

All Behaviour Support will require a portion of non-direct face to face time, as there is a requirement to read, prepare, analyse and review reports and assessments.

If your current NDIS funding is insufficient at present to receive the full 'Comprehensive PBS Package' you believe to be reasonable and necessary to your current circumstances, then the EHS team will do what we can with the time and funding that is currently available and develop an NDIS Progress/ Outcome Report request as required. Please note that the NDIA is the final decision maker on all funding decisions.

NDIS: Improved Relationships Category

- **Referral** and review of older relevant reports
- **Assessment Phase** resulting in a suitable Clinical Formulation and Functional Assessment (will require observations, interviews, access to monitoring forms, incident reports, access to current data and other appropriate assessments)
- **Behaviour Assessment Report (BAR)** and only if funding allows and the need is identified
- **Positive Behaviour Support Plan (PBSP)** with evidence based proactive and responsive strategies
- Senior Psychologist overview if any **Regulated Restrictive Practices** protocols are included (Authorisation must be managed by the Implementing Provider)
- **Consent** from key decision maker(s)
- **Ongoing Training** to family/ carers/ workers/ teachers
- **Ongoing Monitoring** and Review of strategies
- **Progress Report** for NDIS with recommendations for the next review

Behaviour Support packages are tailored to the individual's needs and budget. This may include some or all of the above, which will be discussed after the assessment phase.
