

## Specialised Assessments

### **We offer a range of Specialised Assessments - under your NDIS Improved Daily Living funding**

We provide specific assessments aimed at answering particular questions, or general assessment, addressing a variety of areas of a child, teen or adults' functioning. They are useful to develop an intervention or clarify funding needs. All our assessments come with easy to read reports.

#### **Occupational Therapy Assessments**

- Functional Assessment and a report for NDIS plan reviews
- Activity of Daily Living/ Independent Living Skills Assessment
- Housing Support (SDA& SIL) assessment including detailed report for NDIS funding
- Specialised Assessments when leaving custody for complex support - OT functional assessments and Housing Needs/Support Model assessments together with Forensic Psychologists to determine the right housing/support model

#### **Speech Pathology - Communication Assessment**

Comprehensive Communication Assessments for clinical evaluation of language fundamentals and abilities. Specialised Communicative Competencies Checklist (CCC) interpretation and a range of other screeners and assessments that only Speech Pathologists can administer.

#### **Psychologist - Cognitive Assessments**

Our Psychological team routinely conduct Cognitive Assessments, which are primarily intelligence assessments useful for schools or funding purposes, we are able to deliver the Wechsler Testing package:

- WAIS V
- WISC V
- WIAT

#### **Sexual Knowledge Assessments**

We offer a variety of specialist assessments for people interested in exploring their sexual needs but unsure where to start, or where there has been inappropriate sexual behaviour or comments.

- Sexual knowledge, consent and risk assessments

## Vocational – Finding and Keeping a Job Category

Vocational assessments are helpful for adolescents or adults who are deciding about a career path. Psychological, aptitude and personality assessments can help assist in the kind of occupation that is suitable for a person.

## Support Model Assessments

Comprehensive assessment to outline the person's clinical and personal needs overall and makes recommendations on the most suitable support model and home living environment. Complex participants can benefit from a multi-disciplinary occupational therapist and forensic specialist collaboration.

## Behaviour Assessments

- Functional Assessment – Behaviour & Adaptive Functioning where behaviour incidents are a concern.

## Forensic – Specialist Assessments

Forensic assessments are designed to evaluate a person's psychiatric, psychological, trauma and medical history to assist in legal proceedings and to help manage risk.

- Forensic Risk Assessment of sexual, violent, and other criminal offending behaviour
  - to provide expert insights into how to manage the risks associated with these behaviours in a measured and disability-informed way.
- Cognitive and other assessments for court diversion purposes including preparing reports for Section 14 applications.

Please make an enquiry and we can help you determine what assessments are best suited to your needs and provide a quote.

NDIS funding category is usually Improved Daily Living or Core Supports depending on which profession is required.

Assessments with a report usually require 10 – 25 hrs, some complex multi-disciplinary assessments may require additional hours.

For more information or if you would like to book an assessments make an enquiry at [referrals@ehs.org.au](mailto:referrals@ehs.org.au) or on 1300 372 121.
